# Bright News of Indiana from Journal Correspondents

# DULL WEEK IN OIL IN SOUTHWESTERN FIELDS

Caused a Slump, but January, as a Whole, Was Good.

Special to the Indianapolis Journal. oil is about 34 and is accounted good.

Wilson and Roemhild farms, just southeast well when shot was reputed to be worth from twenty to thirty barrels a day. Upon being pumped, however, seventy-two barrels were obtained in eighteen hours, a showing of a good ninety barrels a day. One fine features of these wells, and of many others in the Coffeyville district, is the shallowness of the holes. This hole is only 290 feet to the pay sand, thirty-nine feet of the latter being encountered. The Atlas company is now working on its No. 12. E. O. Eyeman, of Kansas City, has brought in a good well on the Geiger farm, northwest quarter of Section 7, Independ-

In the Independence field Smith & Booth have finished a fine producer on the Booth farm, south of the rich Skoko pool. This well looks good for 150 barrels. Four rigs are in operation on this farm. In the Chanute field there is the usual number of new wells, but none of note. In lection 6, Tioga township, the Home Oil Company has located four small wells. The holes are sunk close to the thousand mark

encountered, but the liquid was not there in copious quantities. Each well will average about five barrels a day. A well that is performing in a very satisfactory manner is No. 12, of the West Plant Company, on the F. H. Campbell farm, Section 25, the southeast quarter, in Tioga township. It flowed about twenty-five bar-

and a good thickness of oil and sand was

rels in the twenty-four hours after it was Below is given a recapitulation of the report of the wells drilled and drilling in the Kansas and Indian Territory fields, showing a gain in wells drilled of forty-three over the month of December:

STANDARD OPENS A GUSHER IN GIBSON

Special to the Indianapolis Journal. PRINCETON, Ind., Feb. 5 .- To-day's development show the Standard's well No. 2 to be a big gusher. Conservative oil men believe it will be the best producer in the State and a Standard representative says it will be good for 600 to 800 barrels a day after settling down. Others think it will reach a thousand. The oil is of the same quality as that found heretofore. Oil men are much worked up over the strike and think it is only the beginning of the real development of the field.

### STRIKE LOOKED FOR.

Block Coal Operators and Miners Expect a Wage Struggle. Special to the Indianapolis Journal.

BRAZIL, Ind., Feb. 5 .- The block coal operators here are confident there will be a strike in this district unless the miners decide to accept a reduction in wages. A leading operator who is conversant with the situation contends that a reduction of wages in mining is inevitable. He says that in the East employes in other lines of business have been forced to accept reductions, and it is not reasonable to suppose that when wages in all other lines of business are declining, the operators can continue to pay the present high scale. He said that last summer the Eastern operators stored thousands of tons of coal along the lakes in the Northeast in anticipation of securing high prices for it, but the Illinois operators stepped in and secured the contracts at a much less figure than their competitors were asking, consequently they were enabled to dispose of their coal and are now offering it at a very low figure. The leading miners are just as certain that their officers will not consider a proposition containing any reduction in wages; hence a strike appears inevitable.

### Laughed at Fall of Eighteen Feet.

Special to the Indianapolis Journal. SHELBYVILLE, Ind., Feb. 5 .- Frank Swartz, one or the engineers at the Karmire furniture factory was called to the second story of the building yesterday and intended taking the elevator in the descent. He did not notice that it had already gone to the lower floor and stepped into the opening, falling a distance of eighteen feet to the floor below, his head and shoulders striking the floor. He got up laughing and walked away as if the accident was of every day occurrence.

### Contracts for Eighteen Wells.

Special to the Indianapolis Journal. SHELBYVILLE, Ind., Feb. 5 .- The Citizens' Natural Gas Company, of this city, the southern part of Hancock county and the northern part of Shelby county. The Greenfield Drilling Company has the contract for putting in eight wells in the northern part of Shelby county and the Michael Holloran Company, of Indianapolis, will sink ten wells in the southern part of Hancock county.

## Gas Discarded as Fuel.

Special to the Indianapolis Journal. MARION, Ind., Feb. 5.-Natural gas will no longer be used as a fuel at the Marion Soldiers' Home. There was a shortage of fuel during the severe cold weather of the past several days, and it was almost impossible to keep the barrack comfortable. The small quantity of coal in storage at was insufficient to run the hot-water plant. It is estimated that 3,000 tons of coal a year will be necessary to supply the institution.

No trouble to get breakfast quickly if you have Mrs. Austin's Pancake Flour.

NEW DRAINAGE PROJECT.

Ditch to Be Dug in Porter County, Intersecting the Kankakee.

Special to the Indianapolis Journal. VALP RAISO, Ind., Feb. 5.-A new plan for the drainage of the Kankakee region is under consideration in Porter county, which if successful will mean much to the south part of Porter, Jasper, Laporte and Lake counties, and be of much value to the whole Kankakee region. Nelson Morris, of Chicago, will take a leading part in the project, as much of the territory affected is embraced in his real-estate holding along

The plan as at present outlined is to start a big dredge near the eastern line of Porter county and run south to the Kankakee, intersecting the river about four miles west of the Laporte county line. The ditch will be continued across the river in a southwesterly direction through the Morris property, finally opening into the Kankakee river proper at some point below Water Valley or Shelby.

farm, when the gun exploded and shot off Simms's left hand and a portion of his LAFAYETTE-CHICAGO LINE

J. B. Reed Tells Citizens of Lafayette It Will Be Constructed.

Special to the Indianapolis Journal.

LAFAYETTE, Ind., Feb. 5 .- "Lafayette next summer will be connected with Kankakee and Chicago by an interurban line." J. B. Reed, of the Townsend-Reed Com-Northwestern Traction Line, made this prophecy to-day and declares that he is certain the new system will be constructed of the denomination of \$1,000, to run ten next spring. Mr. Reed says it is the plan a pupil in the school. A trial was held beand thence to Kankakee, but whether the tracks thence will parallel the C. & E. I. Railway to Chicago or strike across into Will county and connect with the Chicago lines at Joliet has not been determined.

In the puzzle of the blacksmith who was to unite the twelve pieces of chain into one continuous piece of 100 links, the clever workman took two of the short pieces containing five links each and opened all these links. Then he placed one link between each of the ten large pieces and thus did the work in fifty minutes. The majority of answers were incorrect inasmuch as they replied sixty minutes

In the exclamation of the lad who is feasting on oranges, the hidden city is KEY WEST—as follows:

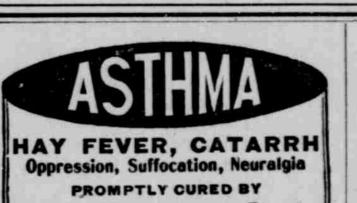

'Seated on the donKEY WE STuffed ourselves with oranges."

Five Cash Prizes of \$1.00 Each Are Awarded Every Week to the five people who solve both puzzles in the best, clearest and most concise way. A puzzle book is awarded to all others sending correct answers to one or both puzzles.

The puzzle books are just the thing for those who are interested in such matters, and when the other volumes which are to follow are issued, they will make the best collection of puzzles and tricks ever brought together, and as they cannot be procured in any other way, only the clever folks can obtain them. Prizes will be changed from time to time.

I will always be pleased to hear-from the young folks and to receive contributions of original puzzles, mathematical and geometrical curiosities. bright conundrums, etc.
